---

## PROJECTS

**EduCrew(E-Learning Platform)**

*December 2025 – March 2025*

**Tech Stack** React, Node.js, MongoDB, TypeScript, Redux, Stripe, Cloudinary

- Developed a role-based e-learning platform with dashboards for students, instructors, and admins
- Integrated secure authentication (JWT), payments (Stripe), and media hosting (Cloudinary)
- Used Chart.js in the instructor dashboard for visualizing course engagement and analytics

**InkVerse(Dynamic Blogging Platform)**

*October 2024-November 2025*

**Tech Stack:** React, Node.js, MongoDB, Redux, Tailwind CSS, Editor.js, Cloudinary

- Developed a dynamic blogging platform with rich text editing (Editor.js) and JWT-secured authentication
- Implemented category-based filtering, commenting, and user dashboards for blog management
- Integrated Cloudinary for media uploads and optimized performance for SEO and fast load times
